

## Recycled water, biosolids and waste product management

# Call for expressions of interest

Are you looking for a rewarding career as a consultant or technical officer and want to work within a team of motivated, high performing science professionals, who enjoy coming to work and take pride in what they do?

Yes? Do you also...

- ✓ Enjoy finding practical solutions to complex problems?
- ✓ Thrive working within a team environment? But also take responsibility for your own performance?
- ✓ Have a strong sense of professional integrity?
- ✓ Work efficiently and effectively? But like to have some flexibility about when and where you work?
- ✓ Have an entrepreneurial streak? Or see opportunities where others see obstacles?
- ✓ Have an interest in managing a diverse workload with a broad range of clients?

### Macquarie Franklin might be looking for you.

We are on the lookout for people who have these characteristics, combined with a selection of the following attributes:

#### **Non-negotiables:**

- Strong science background (preferably tertiary level), with training in engineering, agricultural, environmental or water science.
- A minimum of three years relevant work experience.
- Excellent written and oral communication skills, with experience in writing high quality, scientific reports suitable for different target audiences (e.g. landowners, corporate clients, environmental regulator etc.).

#### **Technical skills and experience:**

*Note: We don't expect one person to have all of these attributes. If you have several of these and are keen to continue to grow your skills in recycled water and biosolids management, that's a great start.*

- Recycled water management – understanding of relevant guidelines, wastewater quality, wastewater treatment processes, feasibility assessments, irrigation scheme design, environmental management plans, site management plans, scheme management, scheme monitoring, etc.
- Biosolids management – understanding of relevant guidelines, land-based disposal / reuse, nutrient balances, composting, site management plans, etc.
- Agricultural systems – experience with farming systems in southern Australia, farm nutrient balances, agronomy, irrigation systems, crop irrigation requirements, water balances, practical management plans, etc.
- Environmental monitoring programs – designing monitoring programs, implementing soil, groundwater or surface water monitoring programs, sample collection / field work, results interpretation, reporting etc.
- Technical skills and experience in land use planning, soil science, agronomy.
- Experience in project management, stakeholder consultation, group facilitation, agricultural extension.

### More about Macquarie Franklin

Macquarie Franklin is a privately-owned, Tasmanian-based consulting company. We specialise in independent advice and services to farm businesses, agribusiness, industry, utilities and government organisations across Australia.

Our team take pride in what they do and gain satisfaction in working with clients to achieve practical and useful outcomes. The advice offered by our technically competent and experienced team is honest, independent and based on the best science and information available.

For more information about Macquarie Franklin, please visit our website [www.macquariefranklin.com.au](http://www.macquariefranklin.com.au)

### What can Macquarie Franklin offer you?

We are not advertising a specific position description. We prefer to find people who will fit and thrive within our team and who add value through their experience, skills and networks. We then discuss the other details.

We are open to expressions of interest from people with three or more years of relevant experience and are looking for either a technical officer, consultant or senior consultant role. We value workplace flexibility and will consider part-time and full-time proposals.

Macquarie Franklin has offices in Hobart, Launceston and Devonport. There is generally some flexibility about where staff are based, depending on the type of work they do and if it is location dependent. For this role we do require you to be based in Tasmania and work out of one of our offices, although there is potential to negotiate partial working from home arrangements if required.

### If this sounds like something you might be interested in, please get in touch.

To express your interest in working at Macquarie Franklin please email the following information to [admin@macfrank.com.au](mailto:admin@macfrank.com.au):

- A one-pager outlining who you are, why you think you would be a good fit at Macquarie Franklin and the skills and experience you bring to the table.
- A current CV outlining relevant training, experience and contact details (maximum of two pages).
- List two referees we can contact if required.

All submissions and enquiries will remain confidential.
